In My Opinion

Prayer Corner

The Crapper Muse

WARNING: Due to the upcoming elections being some of the most important in the history of our country, this issue of Crapper is unabashedly political. Linda and I have already voted. We hope and pray you all do the same.

Jet Dog Jack - The Book

As of 8/4/22 the story of Jack's life, which became the book Jet Dog Jack, is available on Kindle/Amazon. Also, soon to be released is an audio version on Amazon/Audible.

Channeling my Buddy, Jack (He may be gone, but his ideas live on.)

Jack on MMM (Mixed Muslim Messaging): "Dad, up here in Dog Heaven they say that in countries where the Muslim population is in the Minority, they are obsessed with 'minority' rights." In my dream I replied, "I agree but in countries where the Muslims ARE the majority, there are NO minority rights."

Jack on Gender: "Dad, up here we think the Left needs to get their story on gender straight, no pun intended." I agreed and replied, "It's hard to understand what they mean when they say, on the one hand, there is a huge gender pay gap, and claim, on the other hand, there are no genders." Of course then the conversation evolved into how the same group saying there are no genders, is demanding we have a female president.

Jack on AOC: "Dad, up here in Dog Heaven we think the 'Bartender Politian,' AOC from New York is confused, because we see, in a recent speech, she literally screamed that 'if the Democrats lose the majority in Congress it will be the end of our Democracy.'" We both had a good laugh in view of the fact that AOC is an avowed Socialist. Apparently, no one has yet told her that the Socialist/Communist dogma she espouses totally eliminates 'democracy' in its entirety. Maybe she is unaware of the situation in Ukraine, where people are being killed in the thousands because they do not want to once more live under the Socialist/Communist yoke.

Jack on Election Costs: "Dad, up here they are saying the average cost for a United States Senator's election campaign is \$12,000,000." In my dream I agreed and replied, "When they are spending that kind of money to get a \$174,000 a year salary job, it kind of makes you wonder who they actually work for, doesn't it?" Some dreams last longer than others and this one went on with Jack pointing out to me that the high cost of getting elected must be worth it, because famous bartender/airhead politician AOC; who was supposedly broke when she was elected to Congress, in the space of a few months, now reports a net worth of well over \$1,000,000.

Jack on Woke Folks: "Dad, up here in Dog Heaven we are wondering when the 99% of you humans who are NOT offended by everything will quit catering to the 1% who are?" In my dream I replied, "Probably when the folks down here quit watching all the fake news."

Jack on a 'Shitty' Take on Gun Control: "Dad, up here in Dog Heaven we are able to access unlimited information, and one of my buddies found out that according to the CDC, in the last year there were 287 deaths in the United States caused by medical complications incurred from people putting foreign objects in their anus." I replied, "Isn't it ironic, that is more deaths in one year than civilian deaths caused by AR-15's since records have been kept."

JUST SAYING!

It seems that, in our retirement, Linda and I are simply not seeing old friends enough. Not only are we are busy every single day, but we are in Arizona quite a bit of the year. And now that I'm out of the business world it seems we just don't see everyone like we used to.

That is one reason I have been writing Crapper Chronicles for these past few years. It is a way for us to stay in touch with old friends and gives me an excuse to keep writing. I hope you enjoy it, but since some of the times I get toooooo opinionated, be sure and let me know if you want off the "Crapper" list.

By the same token, if you want to add someone to the list, just shoot me an email and I'll get it done. Richard Farnham of Farnham Associates on the Big Island of Hawaii does my layout work and makes sure my email list is kept secure.

For past issues of the Crapper go to:
<http://www.tompkinspublishing.com/the-crapper-chronicles.html>

Jack on Displaced Workers Finding Other Jobs: “Dad, if people thrown out of work because of the cancellation of the Keystone Pipeline can ‘just find another job’, why can’t welfare recipients do the same?”

Food for Thought

Start Eating Rattlesnake? Due to a recent bird flu scare, the news people are saying you can’t get chicken. I say, why not try Rattlesnake? They claim it tastes just like chicken.

Vegetables are For Eating: I think that after the events of the last couple years, we can all agree that vegetables are simply NOT presidential material!

Fake News: Someone asked me the other day why I had quit watching the mainstream fake news media and I replied, “for the same reason I don’t drink water from the toilet.”

Cheap Gas: I got gas today for only \$1.50! Unfortunately it was at Taco Bell!

Starbuck’s in the Home: Instead of taking the time driving to a Starbuck’s location for coffee, why not just save time and make your own coffee at home? If you want to add realism, and pretend you are actually at a Starbuck’s, then, when the coffee is done, incoherently yell out your own name, and light a \$5 bill on fire.

File This Under...

Naive: Sure, I’ll take another Wuhan booster, just mail it to me. I’ll just inject myself and send the paperwork right back to you. That way it’s safe and secure: You know, just like mail in voting.

What Could Go Wrong: In 2000 Mr. Lederman was a registered Democrat and lived in another state. Now he has moved to South Dakota and is the head of the Republican party in South Dakota. What could possibly go wrong?

Are We Really This Stupid? Historically, in a United States presidential election there are in the neighborhood of 130,000,000 votes cast. In our last Presidential election, magically, there were 159,000,000 votes cast. In many precincts not only did the number of votes cast exceed the number of registered voters; but by the same magic process in many of these precincts, 100% of the votes went for the Democratic candidate. In many cases the drop boxes provided so people could ‘drop’ their ‘mail in’ ballots were monitored by cameras. Now that these surveillance videos have been analyzed, it has been determined that tens of thousands of these ballots were dropped off by only 2000 people. Surprisingly, these people (now referred as ‘mules’) in many cases wore rubber gloves which they removed after delivering the ballots, and even took pictures of the location etc. It is reported that many of these same ‘mules’ delivered several thousand ballots each and also, magically, many of these same ‘mules’ were photographed in multiple states. In addition, it is reported that these ‘mules’ were paid \$10 to \$14 per ballot, and to top this off, when researchers followed the cell phone tracking of these ‘mules’ it was found these people inevitably came and went from local Democratic headquarters in that area. I would suppose the fact that the Zuckerberg people contributing over \$400,000,000 to ‘help people vote’ had nothing to do with any of this. I’m just sayin.....

Editor’s Note: In any given election, there are always a few votes cast that have mistakes and are “adjudicated” by voting officials. Those votes needing to be “adjudicated” are usually less than 1%. However, in Colorado, a state using Dominion voting machines, recent tests showed that the Dominion machines, that had been “upgraded” to supposedly make this “adjudicated” (correction process) easier, showed as high as 60% of votes needing this service. Furthermore, odd as it may seem; the 60% of votes needing to be “adjudicated” (corrected) didn’t just have “mistakes” on them. They were completely blank. Gee, what could have happened? Folks, it’s not only who is voting, it is who is counting and controlling the ballots. In my mind, with all the controversy surrounding Dominion Voting Systems; simply the fact they are used in so many countries that have turned Socialist/Communist in recent years should exclude them from being used here in the United States. I don’t care if you are a Democrat or a Republican, if there is a hint of this voting software being hackable, which has incidentally been proven repeatedly, why in heaven’s name would we even THINK of using it. A logical mind would conclude, when a socialist leaning media is constantly trying to turn our focus to the “shiny object” of overseas events, maybe we should be more concerned with our own backyard.

Consider This: If you are questioning whether or not we have a Socialist leaning, corrupt, politicized main stream media, consider this: Believe it or not, the once again, ever amazing AOC, provides the exact answer to your question. AOC is a 29 year old gal who has never been married, never had a child, never run a business, never run a household, never managed people, never had a professional job (other than bartender), never served on any local committee. She is an ambitious young person with little actual real life experience, and yet wait for it. ... She not only wants to convince us that the way to fix the United States economy is to convert our country to the failed Socialist form of governance, she also wants to tell us how to live our lives, and even more than that, how to manage the world’s climate. Folks, the sad fact is that without a politicized socialist leaning media promoting her, this young lady would be just another no name, no brain, big mouth, congresswoman from a no name district in a crime ridden Eastern United States city. No one would even have a clue who she was, or give much of a crap about what bullshit narrative she was trying to push. However, by being publically elevated by a corrupt politicized media she HAS accomplished at least one very valuable thing: To those of us who actually THINK; she exposes the hidden agenda and tremendous power of a corrupt socialist-propaganda-pushing media.

This and That

How Come the Chinese seem to have so much Money? One reason could be the naive, clueless, and uninformed American Consumer. Want to stop the Russian and Chinese aggression around the world in a matter of days? Tell, Mr. Putin and Mr. Xi, ALL imports from their countries to the United States will be stopped immediately. All ships of Chinese and Russian goods will be sent back, and none will be allowed in our ports. All Communist foreign nationals in this country will be deported. All students from Communist countries attending our universities will be sent home and these universities will no longer be allowed to accept the untold millions of dollars Communist countries funnel to these universities so they will support the Socialist/Communist doctrine. It seems insane to me that the current administration is now telling us to 'tighten our belts', be prepared for 'hard times' and other countless dire predictions. If things are going to be so damn bad let's get er done! There is absolutely no doubt that temporarily things will get very bad; no doubt even dire, but if we get our manufacturing and supply lines back here in America the end result will be worth it! Not only that, it will in all likely hood prevent the war that the current politicians seem so intent on starting. This action would keep OUR workers busy, and would end us sending trillions of dollars to Communist countries that are absolutely NOT our friends. Hell yes, let's have a few hard times, but let us do it FOR THE RIGHT REASON!! If we shut off the cash to Putin, Xi, and those insane Mullahs, I guarantee you that they will stop the damn aggression. Think people, think! Before it's too late. If you buy Socialist/Communist, you support them, you pay for their murderous acts, and you enable them to continually get stronger. People; they don't love you. They are using you and they want to subjugate you, and you are letting them do it.

Mexican Voting, Business and Immigration Laws: It seems a common thought that Mexico is a somewhat backward country, yet they are responsible for an increasing amount of manufacturing and food production that is being exported to the United States, and they are growing much stronger on the world stage. Possibly, we could take a few pages out of their playbook? Just a few items: There are no special bilingual programs in their schools. All voting ballots are printed in the Mexican language, voter registration cards require photo ID, and fingerprint with hologram to prevent forgery. All government business is conducted in the Mexican language. Non residents have no voting rights no matter how long they have been in Mexico. Non citizens will never be allowed to hold public office. Foreigners get no welfare, no food stamps, no healthcare or any other government programs. Any who are a burden will be exported. Foreign investment, and land ownership is strictly regulated to protect Mexican interests. Foreigners are allowed no protests, no demonstrations, no waving of a foreign flag, and no political organizing. Official Mexican policy states that if you try to live in Mexico illegally, you will be actively hunted and sent to jail until deported, and all assets will be taken from you.

Old Racist White Men? It seems popular for the Socialist/Communist legislators and agitators in the United States to disparage the United States Constitution as they attempt to dismantle our Constitutional Republic and replace it with the Socialist/Communist model. The fact that our Constitution has helped guide our country to becoming the beacon of freedom and opportunity to the world is totally lost on them, and, in fact, they say our Constitution is "An outdated relic written by racist old 'white men.'" Too bad these folks don't read any history. The United States Constitution was written by men with an average age of 44.

Easy Listening: Try Kris Kristopherson Radio on Pandora: many of Kris's great songs are played as well as songs by many more artists. Nothing like a nice glass of Merlot watching the sunset and listening to Ghost Riders in the Sky, Big Iron, The Last Cowboy Song, Watermelon Wine, Reasons to Quit, Fire Bay, My Heros Have Always Been Cowboys, Crazy, Yesterday When I Was Young, and so very many more. Enjoy.

Dispensation For Users of Woke Company Products: In a recent conversation with a friend, we were both bemoaning the fact that it is nearly impossible to avoid using products produced by a "Woke" company or an outright Communist company. The upshot of the conversation was: To help us assuage our guilt from supporting companies engaged in trying to destroy our American way of life by buying their products; we agreed that every time we use such a company's products we will to send a monetary donation to a conservative, constitution supporting, political candidate. Our thinking is, not only will it help rid us of the bad karma caused by using "woke" products, it could possibly, maybe, just a little bit, help stem the tide of socialism engulfing the constitutional republic which, at least for now, is our wonderful America. **Editors note:** So far, we have sent several thousand dollars to political candidates who don't want the United States to become a vassal state of China.

Famous Quotes

Elon Musk - 4/25/22: "I'm going to buy Dominion Voting Software next and incorporate that technology into Tesla." "Then I can make 100 cars in a day and 60 more magically show up overnight."

Donald Trump - 1/16/14: "I hope we never find life on another planet because if we do there's no doubt that the United States will start sending them money."

Michelle Obama - 2001: "Someone is going to have to give up a piece of their pie so others can have more."

Barrack Obama: "When it comes to climate change, time is really running out. Earth Day is a reminder that if we pledge to do our part and then follow through on those commitments, we can help preserve and protect our planet for future generations." **Editors note:** It seems Michelle and her husband have apparently been the happy recipients of a steady diet of "pie." After a few years in politics they are now multi- multi millionaires. In 2019 they purchased a \$14,000,000 estate located in Martha's Vineyard, an exclusive community next to the Atlantic Ocean, and they also own another ocean front property in Hawaii. Apparently the benefits of eating "pie" have cured the phantom "climate change" and subsequent worry about "rising oceans" that used to bother them both.

THE CRAPPER MUSE

Cottonwood Cathedral

I was splitting wood that fine fall
day,
Fighting a cold that would not go
away.

As I took a rest to catch my breath,
Autumn on the cottonwoods did
the rest.

This smallish grove, with deadfalls
packed,
Was a treasure chest with riches
stacked

With golden leaves on whispering
wind
And creaking boughs from
branches pinned.

Many colors made up the scene:
Earth tones, yellows, reds, and
greens.

Above it all the sky was true,
The purest color of robin's egg blue.

Movement constant but quietly
felt,
Leaves spiraling down the ground
to pelt,

Behind it all a chorus of breeze,
The click and clack of the falling
leaves,

A song of winter on its way:
To me it said, Don't waste this day.

Amid the song and swirling leaves,
One knows in God he must believe.

Thank you, Lord; for this day I was
needful.
Thank you for showing me your
cottonwood cathedral.

10/18/98

Editorial

More Electric Lunacy: It is no secret that the Green Squad is going after all fossil fuels. Of course they are all well fed, and the easy availability of cheap, high quality food, has never been a problem for them. However, now they are actually going after the greatest jewel and one of the most powerful economic drivers in America. Who would that be? The American Farmer. Unbelievable as it may seem, even farm equipment giant John Deere is trying to develop and push this Climate Change insanity. Farmers are often not vocal when speaking up about craziness, but recently when a large farmer received a phone call asking him if he would be interested in "going electric" with his tractors and combines by 2023 he voiced the following common sense questions.

A) "Ok, how do I charge up the batteries of my tractors and combines when they are 3 counties away, in the middle of a cornfield, in the middle of nowhere?"

B) "How do I find the time to charge the batteries on these units when I need to run these tractors and combines 24 hours a day for 10-12 days straight during the peak activity seasons of planting and harvest?"

C) "How do I get a 50,000+ lb. combine, that takes up the width of the entire road back to the shop 20 miles away when the battery goes dead?"

After asking these pointed questions, it is reported there was dead silence on the other end of the line. After a long pause the John Deere representative's reply was the usual non-answer of the left... "We're working on it."

Unbelievable to us in the Ag community is the naive, uniformed, and frankly dangerous power of our current ignorant politicians. Folks, we in the United States have always enjoyed ample food supplies. In sharp contrast to most other countries of the world, as a nation, we have never starved. What these ignorant climate fools do not understand is when crops are planted and harvested, both operations need to be done on time, and quickly. Delays can have a material effect on the value, quantity, and the very ability to even produce a viable food crop at all. One of the reasons the United States has always been able to literally "feed the world" is that, lucky for us, in the United States most of our farmers not only are "free and independent" operations but they are independent and critical thinkers. These independent men and women somehow find ways to produce bountiful crops of grain in spite of contrary weather, challenging economic conditions, and roadblocks thrown up time after time by brainless Politicians. However, to further saddle them with trying to figure out how in hell to "charge up" a tractor or combine in the middle of nowhere with deadlines and inclement weather demanding quick results, is simply economic suicide for this country.

Once again, think about what is most likely our great country's greatest strength and asset: Cheap plentiful food, courtesy of The American Farmer. Think about the fact you can buy all the food you can use, all the time, at a VERY affordable price. Think about other countries where this easy availability of food would be a dream. While you are at it, think about how the communist party of China now owns some of our largest food packing plants here in the United States. Think about how they are quietly trying to get control of our grain shipping and purchasing facilities and increasing amounts of our farmland. Once again: People wake up, talk about it, demand some answers from our politicians. Food is not a joke. If you think it is, try going on a hunger strike for a few days to protest how much you "hate food." Let Jack and I know how it goes.

Prayer Corner

Linda and I have no doubt that prayer is a wonderful, powerful thing. Like so many things in life, I guess you either believe in the power of prayer or you don't: If you do please keep your friends and loved ones, those who are suffering illness, and despair in your daily prayers. Our short list is Konnie, Scott, Dan, and Gene: Let us pray.

As always, thanks for reading Crapper and remember, we have our families, our friends, our health, and time. The rest is simply smoke and mirrors!

Chuck Tompkins
