Jet Dog Jack - The Book

As of 8/4/22 the story of Jack's life, which became the book, "Jet Dog" Jack, is available on Kindle and Amazon. And now there is an audio version available for sale on Amazon and with your subscription on Audible.

Channeling my Buddy, Jack (He may be gone, but his ideas live on.)

"Dad, I hear uncle Casey is much happier after he got rid of his Jeep pickup and is now back driving a Ford F-150." In my sleep I replied, "Yeah Jack, sometimes you have to leave home to remember how good you had it before!"

"Dad, up here we see that on Earth, in virtually all cases, a worker has to remain 'drug free' to keep their job". In my sleep I replied, "Yeah, it is a sad fact that the 'drug free' people who have jobs and are doing the very best they can to take care of their families and pay their taxes, have to be drug free; but the people who are on public assistance, who are taking money and not earning it, don't."

"Dad, up here in Dog Heaven they say if Israel puts down its arms, there will be no more Israel" In my dream I replied, "That's true Jack, and if the Arabs would put down their arms, there would be no more war."

"Jack, if dogs have such a sensitive nose, why in hell do they roll in dead fish or crap?" In my dream Jack laughed and replied, "Hard to say, Dad, it makes about as much sense as you humans allowing the dumbest person in the pack lead the country!"

"Dad, from up here, Dubai looks like a wonderful fairyland kind of place." In my dream I replied, "Yeah Jack, all paid for by the clueless American consumer who thinks we should not use our own fossil fuels." Jack replied, "Dad, do you think they will ever realize fossil fuels from the Middle East cause exactly the same amount of pollution as fossil fuels from right here in America?" I laughed and replied, "No Jack, don't ever expect the Green Initiative to confuse the issues with actual FACTS."

Editorial - Electric Vehicle Charging Center News

Are you lonely? Are you looking to connect with people who share your common thoughts and mindset? Are you tired of talking to someone about man-caused climate change, only to find out the fool thinks it is a perfectly natural occurrence that has been going on for millions of years with or without man's help? And above all, are you GREEN? If you answered yes to the questions above, I have found just the place for you to meet like-minded people. It is a place you would not expect, and it is a totally new concept, but it has come to your town in one way or another, in these past few insane

JUST SAYING!

It seems that, in our retirement, Linda and I are simply not seeing old friends enough. Not only are we are busy every single day, but we are in Arizona quite a bit of the year. And now that I'm out of the business world it seems we just don't see everyone like we used to.

That is one reason I have been writing Crapper Chronicles for these past few years. It is a way for us to stay in touch with old friends and gives me an excuse to keep writing. I hope you enjoy it, but since some of the times I get toooooo opinionated, be sure and let me know if you want off the "Crapper" list.

By the same token, if you want to add someone to the list, just shoot me an email and I'll get it done. Richard Farnham of Farnham Associates on the Big Island of Hawaii does my layout work and makes sure my email list is kept secure.

political years. It presents a great location for not only lonely Green folks to get together and kibitz, but possibly may even become a budding new 'Green Economic Opportunity Zone' (GEOZ) where even more government subsidized businesses can locate, and that taxpayers can support.

Where is this wonderful place, you say? Ladies and gentlemen, it is none other than your local electric vehicle charging center (EVCC). Why will these EVCC's soon offer such opportunities for conversation, possibly a leisurely lunch, maybe a workout in a nearby health spa, or even perusing the latest fashions? The reason is simple: Maybe you haven't thought about it, but where, in the past, people simply fueled up their 'fossil fueled' vehicles in mere minutes at some local gas station, and then went on their way; now with the new GREEN cars, it takes far more time to 'fill the tank,' so to speak. It is not at all out of the question that, where in the past it would take maybe 5 minutes for the 'fueling' process, now, depending on the amount of 'fuel' needed, the same procedure can easily take 45 minutes to an hour or more. In addition, if you live in a cold climate and you have to run your EV's heater while it is charging, it is possible that your vehicle will not be able to charge faster than your heater is draining your car's cold battery. A final reason you may have plenty of time to burn, while you are at the EVCC is that it depends, of course, on there even being a 'fueling' receptacle available at the time you need 'fuel.' Of course, not to worry, this wasted time is not a problem, because you, like virtually all like-minded folks 'fueling,' will certainly agree with Apple founder, Steve Jobs, mentality; that your time is worth nothing anyway, so why not spend it kibitzing. And, you know, doing things that folks whose time is actually worth something, don't have time for.

Folks, these long delays simply do not need to be an annoyance, because like so many consequences of the current, 'non-think/green-think' agenda, these endless delays can be golden. The very fact you now have to waste hours 'fueling' your 'green-mobile' presents a huge opportunity. A person can take this time to meet like-minded folks, most of who will share your glowing view a utopian future. It goes without saying that, on the vast majority of subjects discussed at the EVCC, most of you will be on the same page. Not everyone, but the majority, will share your very progressive political views, and your uneducated, politically-charged, naïve view of man, caused climate change. Don't be surprised if more than a few will also support the 'total fairness' of having your children sharing bathrooms with virtually anyone, of any sex, who walks in. Or if they wholeheartedly agree that your daughter's having to compete in sports, such as swimming, with far bigger and stronger male who, 'identifies as a female,' is a great idea.

You will be able to quickly locate and chat with many who, for the most part, are wholeheartedly behind promoting, not the best qualified people for any given job or higher education opportunity, but rather those who were or are disadvantaged; most likely by being born to a supposedly 'ethnically-challenged' race. The fact that many of these job candidates, and prospective higher education students, had less than stellar performance or academic records (which used to be an obstacle to advancement) should no longer find it a hindrance to their career paths. I'm sure the majority will agree that, if for instance, such a person becomes a doctor, they would certainly be a big help to the other 'lesser privileged' people; and as long as they are not YOUR doctor, they will prove to be a huge boon to mankind.

It goes without saying that as time marches on these 'fueling centers' for the Green will expand to become actual strip malls, where they will attract still more micro-breweries, wine bars, coffee shops, and possibly some light 'high-end' shopping. No doubt they will eventually include a 'Dog Spa,' where you can drop off little 'Tofu' for a shampoo and a haircut. Of course, there will be the ever present 'fitness centers and spas, offering buff bodies, modern hair styling, 'Pedis' and 'Manis'.

Future utopian views do not rule out these 'fueling' centers being located at, or very near, a casino. Why not? With all the money green drivers are saving by 'fueling' with subsidized electricity, rather than non-subsidized, highly taxed, expensive fossil fuel, and additionally, saving even more extra cash by not paying road taxes, they can treat themselves to a little 'light gambling,' and maybe win a few bucks in the process. On the home front, if a person gets a little carried away at the Casino, or maybe had a few too many beers at the Micro-brewery nearby; instead of using the lame old excuse of, "Sorry I'm late honey, my buddies wanted me to join them for a few beers," a guy can attempt to stand up straight and declare, "Honey, there were no available 'fueling' ports so I had a couple beers while I was waiting!" If the little lady is tired of the guy's constant excuses, gambling and drinking, and kicks him out. Who knows, maybe the lonely fellow can find a new bride that he met while they were both 'fueling.' Perhaps someone who has views more like his own.

Folks, these are just a few views and observations that came tumbling into my old head, while I was driving by a new EVCC (electric vehicle charging center) down here in Scottsdale, AZ. The several people standing around chatting while 'fueling' their cars, at first simply, triggered my sense of disgust at yet another tax payer subsidized, new money pit. To be perfectly clear, I don't hate electric cars or those that drive them. However, I look at this EV issue the same way I view abortion. I feel that the decision to have either one is up to the individual. I just don't like to see my tax dollars paying for it.

Luckily, my sense of humor kicked in as I envisioned a future GEOZ (green economic opportunity zone). The thing I found funny about the acronym GEOZ was it reminded me of "Gee, Oz." To myself I thought that possibly, when the

'screen' is pulled back from this political clown show masquerading as our current administration, possibly, just possibly, gullible people, similar to Dorothy in The Wizard of Oz, will see the utter stupidity of the entire Green Agenda. Redefining gender, not valuing a person's time, or the necessity of good job and academic performance. Without the constant propaganda screen, people may once more realize the absolute necessity of not believing, and parroting, the endless propaganda spewed by our now, by and large, fake news media. We can hope, without the screen, people will once again learn to read and absorb non-political, factual information, from verifiable experts, who are not receiving a government grant in the field being discussed. Maybe, just maybe, someone will finally say, "The Emperor has no cloths!"

Oh, just a sidenote: The reason I happened to be in the area that day was I was on my way to finalize the purchase of my new pickup truck: It will undoubtedly burn more than enough good old unsubsidized fossil fuel to make up for the unpaid road taxes of quite a few 'green mobiles.' **People: Read, Think; then Vote. And oh yes: Drive Safe!**

Quotes and Thoughts

Actual Statement: From the current 'Climate Czar' Kerry: "We've got to cut down on farming due to climate change; or people are going to starve." Read this as many times as it takes you to realize a few things:

1. These people think you are stupid.
2. The people saying dumb shit like this are the stupid ones.
3. If you ARE in fact stupid enough to keep voting for any political party who would allow this idiot to be the mouth piece on America's climate policy, just maybe you eventually will starve.

Actual Statement: from Winston Churchill: "When Muslims are in the minority, they are very concerned with minority rights; when they are in the majority, there are no minority rights."

Actual Facts: Hamas is a terrorist organization: Israel is not. These non-United States citizens, attending our universities, that are promoting and inciting riots in support of Hamas should be given 24 hours to pick up their crap and then immediately be deported, to be dropped off at the nearest Hamas recruiting center.

Border Crossing 101:

- Crossing border illegally into Canada. You get a \$5000 fine.
- Crossing border illegally into Iran: You get 8 years in prison.
- Crossing border illegally into North Korea: You can be shot dead.
- Crossing border illegally into United States: You can get a driver's license, medical care, free clothing, free food, free housing, welfare, free legal representation, free education, free college. All sponsored by the people who voted for the current 'Shit Show' administration that is running the country.

Transgender Sports Revisited:

William Thomas: Ranked #462 in Men's Collegiate swimming. NOT a big deal. A real NON-EVENT.

Lia Thomas (same guy): Ranked #1 in Women's Collegiate swimming. Now he/she IS a big deal.

Any questions? Oh yeah, I've got one, "Where in hell are all the people who are concerned with actual women's rights?" I'll wait.

Shorts

Humor Evaporates Fatigue: I recently drove a new vehicle from North Dakota to Phoenix. As all of you know who have made this drive, it is a long one. The route I took was 1657 miles; two long days and 25 total hours of hard driving. The second day, I was still six hours from Phoenix and was really starting to feel the effects of so many miles on the road. To perk myself up I began to randomly look for some good listening on Sirius XM radio. It seemed all I was finding was rap anger music, or Taylor Swift endlessly singing 'oh, oh; oh, oh.' Luckily, I finally stumbled on a series of humor channels. After going past a number of them that basically were nothing but a nonstop barrage of profanity, I happened on channel 97, which is the Jeff Foxworthy and Larry the Cable Guy, humor channel. Wow! Here I was all alone in my vehicle, laughing so hard that tears were running down my cheeks! I realized, after an hour of enjoyment, that fatigue no longer bothered me, I was in a most excellent mood and the thought of the remaining 5-hour drive was not even an issue. Furthermore, on arriving in Phoenix, when Linda said, 'you must be exhausted,' I replied, "I feel great, let's go out for dinner!" Humor: Don't leave home without it!

Got Junk to Get Rid Of? Call Mike Braico at Tough Guy Junk Removal, 480-450-2334, or toughguyjunkremoval@gmail.com. Mike will stop over to your place, remove the problem material, and solve your problem, quickly. Linda and I had Mike stop by and get rid of an old mattress, and a bunch of other unneeded material, yesterday, and he turned a problem into a non-problem, in minutes.

v39 MUSINGS

Two Old Snowmobilers

You'd think it would be lonely
around the ranch,
What with the horses, the cats,
and even the dog now gone.
Since it's now only the two of us;
But you'd be wrong.

With the wind, the cold,
And spittin' snow,
You'd think a person would be
cold,
But that would be wrong too,
you know.

Theres a warm flame in the fire-
place,
A wonderful smell is tickling
my nose,
From a nice savory stew,
Simmerin' away on the stove.

These soft comfy chairs are a
blessing,
For two tired old backs,
Worn down from too many snow-
mobile rides,
And thousands of drifts to
attack.

Too many times,
Of gettin' bucked off the sled.
Too many tumbles,
And blows to the head.

A person would think maybe we
were too tough on our bodies,
You know, we were used too
much, when we were new.
Maybe we squandered too many
days,
As through life we flew.

But you know, the snowmobiles
brought us together,
To begin a romance for life,
Though now it's just the two of us
here,
We are husband and wife.

We are not cold, or lonely,
Lookin' out over our land.
We're just two old snowmobilers
in love,
Sittin' here; holdin' hands.

Chuck for Linda's Birthday.

Old Movie Perfectly Explains Bidenomics and Inflation: The 1990 movie, *Home Alone*, explains both Bidenomics and the inflation is has caused, perfectly. In this movie, Little Kevin goes to the grocery store. He buys milk, bread, toilet paper, laundry detergent, fabric softener, cling wrap, macaroni and cheese, a turkey TV dinner, orange juice, and a bag of plastic Army men. The cost \$19.83. In 2022, those same items would have cost little Kevin \$44.40. Now, here we are one year later, in 2023, and those same items would have cost little Kevin \$72.28. Am I getting through to you?

Some of Life's Big Mistakes & Mysteries: Given money, your mailing address, your e mail, or God forbid, your phone number, to any online marketer, or gasp!, Political Party? Ever notice that all of the subsequent spam you get says, "Reply 'stop' or 'unsubscribe' if you want to be removed from our list." So, you go ahead and hit 'stop' or 'unsubscribe' to get rid of them. But then, big surprise, now you get hit from a host of other similar products, political candidates, do- good organizations, and health food purveyors. By hitting 'stop' or 'unsubscribe,' all you apparently accomplished was to move your name to another list or, more likely, lists.

If Your Life 100% Actually Did Depend on it: We are constantly told by the fake news talking heads, "Your life depends on believing the Green New Agenda" My question: If your life, and the life of your family ACTUALLY did depend on this premise; who would you go to, to make sure the statement was true? Let's cut the bullshit and get real here. If your life and the life of your family ACTUALLY did depend on your buying into the Green Agenda, who would you be interested in talking to or reading about to make sure? May I humbly suggest that you seek out actual climate experts, such as S. Fred Senger, or Dr Judith Curry, or the former head of Green Peace, or the founder of the Weather Chanel, or hundreds of other ACTUAL climatologists WHO ARE NOT getting government funding, that depends on their parroting the current green lunacy! Or are you going to listen to the untrained, unknowledgeable, rantings of talking heads such as John Kerry, with his degree in Political Science, or the Scandinavian high school dropout, Greta Thunberg? Or the thousands of politicians, movie stars, and controlled news outlets with an agenda to push? Again, are you nuts? **People, for Gods sake, Read, Think, and then Vote, would you?**

**GREEN
AGENDA**
Where Green Ideas Connect

Book Report

Black Rednecks and White Liberals, by Thomas Sowell: This book is a deep dive, and it will take you a few days to read and absorb its 291 pages. However, black social commentator Sowell, as usual, lays bare so very many misconceptions, misunderstandings, and attempts by people to re-write proven history. This book will clarify, like no other book, so many things. He discusses slavery, the Jewish impact on the world, Germans and history, Black education, achievements, myths, and tragedies, and finally, History vs Visions. Do yourself a huge favor. Read it!

Prayer Corner

Linda and I wholeheartedly believe in the power of prayer. Please take a minute to say one for a friend in need, and while you are at it say one for our great country.

As usual, thanks for reading Crapper and remember: We have our family, our friends, our health, and time...The rest is simply smoke and mirrors!

Chuck
