Channeling My Buddy Jack

Jack: "Dad we hear that there are some people who are worried about a former plumber running homeland security." In my sleep I laughed and replied, "Yeah, Jack and yet those same people have no problem at all with a former bartender wanting to be president." The conversation went on with me reminding Jack that the 'bartender' who claims to have an economics degree actually only took 3 classes in economics and got poor grades in all of them. Her degree was primarily in 'foreign affairs'.

Jack: "Dad what do you feel is the single dumbest thing you have ever wasted lots of money on?" In my sleep I mumbled a single word, "Taxes."

Jack: "Dad, up here in Dog Heaven we were talking the other day about how the transcontinental railroad was completed in 6 years and covered 1900 miles." In my sleep I laughed and said, "Yes, Jack and California's high-speed train has cost billions of dollars and in 10 years has exactly 0 miles of track."

Jack: "The other day we noticed that a young guy down there had posted that capitalism exploits the workers for the benefit of the rich." Sleepily I replied, "Yeah, that was the same kid who had just paid $1000 for good seats at a Taylor Swift concert." This dream conversation continued with Jack saying, "The same kid posted that ANTIFA is anti-fascist because its right in the name." I replied, "the kid should look at MAGA, because Make America Great Again is right in that name as well."

Jack: "Dad, up here we see that the label on a container of salt had the statement 'This salt was formed by primal seas more than 250 million years ago.'" In my sleep I actually laughed as I replied, "Jack, thank God all the bureaucrats are looking out for us; did you notice that due to labeling laws, the exact same container also shows an expiration date of a couple years ago?"

Bullshit

Contrails v/s Chemtrails: You are kidding me, right? Proving once again that it is amazing how many people need ZERO proof to believe a lie, but need endless information to believe the truth, here we go again with a tired old conspiracy theory that seems once more to be making the rounds. This new reincarnation concerns the tracks (contrails) we have been seeing in the sky behind high flying jet and even prop driven aircraft for the past several generations. The old conspiracy theory is that these contrails are in fact chemicals being dispersed against the world population. In reality, anyone with even a

JUST SAYING!

It seems that, in our retirement, Linda and I are simply not seeing old friends enough. Not only are we are busy every single day, but we are in Arizona quite a bit of the year. And now that I'm out of the business world it seems we just don't see everyone like we used to.

That is one reason I have been writing Crapper Chronicles for these past few years. It is a way for us to stay in touch with old friends and gives me an excuse to keep writing. I hope you enjoy it, but since some of the times I get toooooo opinionated, be sure and let me know if you want off the "Crapper" list.

By the same token, if you want to add someone to the list, just shoot me an email and I'll get it done. Richard Farnham of Farnham Associates on the Big Island of Hawaii does my layout work and makes sure my email list is kept secure.

mild understanding of high-altitude flight will tell you, these 'tracks' are nothing more than very cold, minus -50 degrees Fahrenheit, high altitude air, being 'condensed' to water vapor (hence, the word 'contrail') after being exposed to high temperature exhaust. This phenomenon has been happening since World War II when flight into the super cold high altitudes first became possible. These contrails are not; as conspiracy advocates proclaim, "the government spraying 'poisonous aluminum nanoparticles' from airplanes." Let's get real, if these types of bullshit theories were in fact being done, it would necessitate the 'keeping quiet' of literally tens of thousands of federal and private aviation employees worldwide. To get back to reality these 'Chemtrail' conspiracy theorists need to call *1 800 GET A LIFE.*

Unbelievable Bullshit You Simply Can't Make Up

Grants: After receiving millions in government grants; it is reported that the nonprofit; *Citizens Network for Foreign Affairs* spent $57,000,000 in the following way:

$28,000,000 Salaries and benefits (roughly 100 employees)
$12,000,000 Subcontractors
$ 3,000,000 Travel
$ 5,000,000 Consultants
$ 9,000,000 Misc other expenses
$ 4,000,000 On actual money distributed in actual grants.

Last Year/This Year: Last year the UN Nuclear Non-Proliferation Review Conference found Iran to be in violation of this UN Committee's policies. This year the UN Nuclear Non-Proliferation Review Conference elected the Republic of Iran to be the Vice President of this same committee. **Folks you literally can't make this shit up!**

And the US is the Bad Guy? It is reported there are 193 countries in the world. It is also reported that 177 of them receive some sort of funding from the United States. **Think about it.**

Rifles vs Bowel Impaction: Rifles were involved in 401 deaths in US last year. Constipation caused by bowel impaction caused 901 deaths.
So obviously, being full of shit is twice as dangerous as rifles.

All Bullshit Aside

Health Advice for Seniors: All bullshit aside, diets, pills, and injections, of course, have their place in maintaining our health. However, basically, the #1 best way for we seniors to stay healthy is to be as physically fit as possible. Is this easy? No. However, in the scheme of things, we need to think seriously about where we are spending our time. Why not get IN THE HABIT of doing some exercise every few days? Our lives are made up of habits. Keeping yourself in a reasonable state of fitness is simply a habit. And, who knows, it may just save your life. By the way, if you are having trouble summoning the willpower to do some exercise, just stop up to any hospital emergency room or cancer ward. Look around you. If that doesn't motivate you nothing will. **Now, get to work.**

Story Time

September 18, 1979

Today was one of those North Dakota, September, absolutely-perfect, sun-shining, not-a-cloud-in-the-sky, 65 - 70 degree, no-wind, fall-smell-in-the-air, leaves-turning-to-gold, geese-honking, hay-curing, beautiful days. I absolutely had to go running.

As I got warmed into my route, I was over by the Morris Rodweeder end of it. They were spray painting, and the faint metallic smell of the paint was in the air. I saw a man walking his dog, and instead of getting tense, as I usually do when I see a dog, I actually felt friendly toward it. It never even barked. Maybe dogs can sense your feelings, after all.

Running up the highway toward the stockyards, I was reminded of how every car's exhaust smells different. Funny, isn't it? Some are smoky, some are gassy, some smell oily, but all are different. I guess it must depend on the state of tune or stage of deterioration of the motor.

I also noticed how the September sun never seems to be so hot. Even though the temperature may be quite high, the sun never seems to want to burn you up, drain you, or tire you out like the July and August sun. Maybe the September sun is just friendlier to joggers.

Ah, now I'm on my favorite leg of the run, down a slight hill to regain my breath and then down by Lowe's truck garden. They must have cut hay today, as that musty sweet smell is unmistakable. I wonder why Brut or Old Spice doesn't bottle that up for cologne. It is an absolutely lovable-type smell.

Now down by the dried-up slough: it's funny how you can always tell a slough by its smell, even when the water is gone. It must be the mint and water plants, with that same spicy, tangy smell.

The sun is just going down, and the way it touches the turning leaves is like the paintbrush of a master. The golds, reds, greens, yellows, and oranges are absolutely radiant. A person has to be a very, very privileged individual to be allowed to take all this beauty in, doesn't he? It just proves the old point that the very best things in life are indeed free.

Quotes, Shorts & Humor:

Famous Quotes:

Eisenhower: "If in 10 years all American troops stationed in Europe have not been returned to the United States, then this whole project (NATO) will have failed." "We must get these people to stand on their own feet militarily." Spoken decades ago, by Dwight D. Eisenhower, first Supreme Allied Commander of NATO.

Stalin: "Those who vote decide nothing." "Those who count the votes decide everything."

Shorts:

When Will This Idiot Go Away? In 1992 Al Gore said that within 20 years Florida would lose 60% of its population due rising sea levels from climate change. Today, 34 years later Florida's population is 425% higher than in 1992 and sea levels remain the same. It is hard to place any credence at all in a lamestream media that keeps promoting the BS information this clown puts out.

Israel: The only nation on Earth that inhabits the same land, bears the same name, speaks the same language, and worships the same God as it did 3000 years ago.

Voter ID: Imagine being a member of a political movement that feels it can't win an election if valid voter ID is required.

Criminal Conflict of Interest? North Carolina magistrate judge Teresa Stokes is reported to be co-owner of Pinnacle Recovery Services. Pinnacle supposedly works 'helping' mentally disturbed people. It is also reported that (oddly?) Stokes sent repeat criminal and attack offender Decarlos Brown to Pinnacle Recovery Services 14 times for 'help'. Brown subsequently stabbed and brutally killed an innocent woman. Why has magistrate judge Teresa Stokes not been charged with massive conflict of interest or at least disbarred? A person finds it odd that a citizen can be blamed for not 'locking up' their guns, yet there is no fine, disbarment, blame or punishment for such blatant corruption and judicial malfeasance such as the above.

ICE: Obama's ICE chief got an award for removing 920,000 illegals from the United States. Trumps's ICE chief got called a Nazi.
PS. Both ICE chiefs are the same person: Tom Homan

Donations: After extensive research, it is proven that Russia donated zero money to Trump's political campaign. With little research it is reported that Russia donated several million dollars to the Clinton Foundation.

California Election Interference: In California it takes, literally, weeks to determine who wins a given election. Officials claim the reason is because that they have to wait for all the 'mail in votes' to arrive. Who knows if it is true, but a person has to wonder if this delay is so the 'democrat socialists' can see how many 'mail in votes' are needed so their candidates can win. However, now a new 'election interference' twist has shown up. Although not verified by this reporter, due to needed maintenance work at 'Peaceful Acres' cemetery in California, the cemetery had to be locked up during the recent elections. Reports are circulating that residents interred there were unable to vote because Greens and Grounds Superintendent, Joe Blow, had accidently scheduled the needed work on the cemetery property to be done during the election. There are reports circulating that authorities may be considering charging Superintendent Blow with 'election interference'.

Curious Statistic: In the last 20 years, of every election that was not decided on election day, 80% went to the Democrat candidates and 20% went to the Republican candidates.

Statistical Impossibility: Recently reported California election information has one case where 24,000 mail-in votes arrived to be counted, in a late-night ballot drop. Not one single vote was for the Republican candidate, Spencer Pratt. People, the chance of this happening, runs in the billions to one category and is statistically virtually impossible to calculate.

Humor:

Javalinas in Minnesota? Arizona and the American southwest are home to large, pig-like rodents called Javalina. The question posed was, do they have Javalina in Minnesota. I had to admit I wasn't aware of any Javalina in Minnesota but if they did, due to the heavy Scandinavian population of that state, the name would probably be spelled JavaLenna and it would then logically follow, that if they had JavaLennas they, for sure, would also have JavaOlys. This 'deep dive' into nature, biologics, colloquialisms, and ancestry, brought to you, courtesy of my 'deep thinker' buddy Bill.

Faith Healer: We went to see a faith healer's act last night. The act was so bad even the lady in the wheelchair got up and walked out.

Socialists/Leftists: If America were a tree, they would root for the termites.

Regal Ladies

Regal Ladies we love you,
You are so rare, your ranks so few.
Porcelain delicate, yet steel strong.
To an exclusive club, you do belong.
But Regal Ladies, it's sad to see,
Day by day you're leaving me.
Regal Ladies with eyes so bright,
Hold on to life with all your might.
Stay with us and don't let go,
Without you here we're lost you know.
Regal Ladies, age invisible ,
Your strength, and beauty indivisible.
Regal Ladies near end of rein,
Your attitude and carriage still the same.
Soft, understanding, mild, serene,
Yet strong and decisive as any Queen.
Regal Ladies no two alike,
Still common traits define your type.
It's not jewelry, position, money or breeding,
When it comes what the others are needing.
Your still firm handshake, your concern and caring.
Genuine interest in us, your presence and bearing.
Regal Ladies, command respect without asking,
Gossip only politely, while multi-tasking.
Keeping families intact, with stories' memories.
We relax, and talk; you put us at ease.
Yet for Regal Ladies the rules were hard,
Fate dealt the hand, you played the cards.
And if the outcome was one you feared,
You dug in, hung on, and persevered.
Regal Ladies with heads unbowed,
You held your ground while others cowed.
In houses chilly with coal fired stoves
You rolled the bread and cooked the loaves
You bore the kids, and trained and scolded
Washed the diapers; dried and folded.
Helped create the world we know,
Showed us the way and helped us grow.
Regal Ladies, so strong yet mild,
Have guided me since I was a child,
The ships you launched, the crisis you stilled.
Pages of history books, many are filled.
With wills of steel, minds sharp as flint,
Your counsel and guidance were heaven sent.
Regal Ladies your life's not done,
Your place in heaven is surely won.
Someday you'll leave; it's the price we pay.
But we'll meet again, another day.
Then friends and loved ones, those you've missed,
Will be held and talked to, hugged and kissed.
Regal ladies standing tall,
Regal ladies I love you all.

08/28/10 - For June, Darleene, Sister Anna Mary, Enid, Myrtle, Ruby, Eva, Clarice, Jean, Sally, Dorothy, Pearl, Ruth and all the other Regal Ladies that have impacted my life, helped me grow, and generally made the world a better place to live.

Bad Texting: Apparently replying by text to a wedding invitation "Maybe next time," is not a good response?

Actors Union: Since so many of the current, ever generous (with other people's money) big talking, left wing socialist leaning, successful, (with minimal education); but non-the-less multimillionaire actors giving part, (only a 'fair share of course') of their massive fortunes to new, unproven, struggling, unsuccessful actors so they too can be rich? You know, like the socialist doctrine preaches.

Reparations: How about reparations to all the honest tax paying American citizens for wasted and stollen tax dollars given to illegals and scammers?

Great WIFI Label: Good way to freak out your neighbors; call your wife "FBI surveillance van #5"

Asking for a Friend: "Which page of the bible is it that explains how to turn water into wine?"

Advertisement for Vacuum Cleaner Store: "Everything we sell Sucks"

Highway Maintenance: Why is there always enough time and asphalt to build speed bumps but never enough of either to fix potholes?

Driver vs Officer: Driver, "It is not how many times you fall down; it is how many times you pick yourself back up." Police Officer, "That is not how a field sobriety test works, sir."

Helpline: Caller, "Is this the helpline for alcoholics?" Receptionist, "Yes." Caller, "Can you tell me how to make a mojito?"

Two Guys Conversation: "My wife says I have only two faults". One, I don't listen well enough and some other crap she was rattling on about."

Health Factoid: People who eat lots of bacon are far less likely to blow themselves up in the name of Allah.

Imagine if You Will: Taking medical advice from a man (Covid God) who actually had to get a presidential pardon to protect him from the medical advice he gave.

Prayer Corner: Please take a moment to say a prayer for a friend, a prayer for a loved one, or a prayer for yourself. The Power of Prayer is real. Give it a try.

Thanks for reading Crapper and as always: We have our family our friends, our health, and time: The rest is smoke and mirrors. Chuck, Linda and Jack.
