Jet Dog Jack - The Book

As of 8/4/22 the story of Jack's life, which became the book, "Jet Dog" Jack, is available on Kindle and Amazon. And now there is an audio version available for sale on Amazon and with your subscription on Audible.
https://www.amazon.com/s?k=jet+dog+jack&rh=n%3A6669702011&ref=bnav_search_go

Channeling My Buddy Jack

Jack: "Dad, up here in Dog Heaven we hear that the left is calling abortion health care." In my sleep I replied, "Yes Jack, and using the same logic we should refer to ICE as travel agents."

Jack: "Dad, I just met two dogs up here in Dog Heaven." "Their names are Rolex and Timex." In my sleep I asked what did the dogs do on earth that got them their names. Jack replied. "They were watch dogs."

Jack: "Dad, up here in Dog Heaven we all know that Socialism/Communism is a failed political doctrine based on envy." In my sleep I replied, "Yes, Jack, the promises of Socialism/Communism are like the cheese in the mousetrap, the mice keep getting caught in the trap because of ignorance, people should know better." I actually laughed out loud when Jack replied "Dad, when I hear supposedly intelligent people trying to defend socialism, their ignorance is so obvious, I actually feel sorry for their dog."

A Canadian Buddy's Rant

It is disappointing to see so much North American resistance to what Trump is trying to accomplish in Iran. As aging baby boomers none of us were alive during the WW2 years but our parents were all mature adults during those years and they willingly gave up a lot to support the war cause. My uncle, a farm boy from my home town died in battle in Italy at age 21.

Imagine getting that telegram. Colleen's dad had just been married 6 months when war broke out in 1939. He enlisted and spent 4 years in France and Holland and Colleen's mom went and worked at the Boeing plant in Seattle for those 4 years. My parents talked about the gas rationing and various restrictions. They sent in their lead toothpaste empties that were then melted down to make bullets. There was no left and right debate or political arguments about helping end the war. And now really, all they can talk about is the price of gas and the resulting increase in price of groceries.

Well boo hoo; 65,000,000 Americans still got in their cars or on a plane and went visiting on Labor Day weekend. And probably paid a whopping $20-40 more to fill up the tank right after they stopped at Starbucks or McDonalds and blew $60 for a shitty meal for 4 people. The concept of packing a nutritious sandwich, a big thermos and some fruit seems to be below the youth of today.

A dirty nuclear weapon smuggled into anywhere in the US could kill a million people. These young and older protestors need to watch a few videos of Nagasaki and Hiroshima which happened just a few years before you and I were born (shit we are old!) and realize that WWII did that with 85-year-old technology. We can now shoot missiles through an open window from hundreds of miles away.

JUST SAYING!

It seems that, in our retirement, Linda and I are simply not seeing old friends enough. Not only are we are busy every single day, but we are in Arizona quite a bit of the year. And now that I'm out of the business world it seems we just don't see everyone like we used to.

That is one reason I have been writing Crapper Chronicles for these past few years. It is a way for us to stay in touch with old friends and gives me an excuse to keep writing. I hope you enjoy it, but since some of the times I get toooooo opinionated, be sure and let me know if you want off the "Crapper" list.

By the same token, if you want to add someone to the list, just shoot me an email and I'll get it done. Richard Farnham of Farnham Associates on the Big Island of Hawaii does my layout work and makes sure my email list is kept secure.

The Europeans must be way more afraid than us because their parents saw the real war in their backyard. And anybody under 30 can't remember 911 so it is kind of understandable that our young people will march and protest anything they don't know much about because even their grandparents did not experience real war except for possibly losing an older relative. And the real shame is that because of the price of gas and groceries there is a strong chance that Trump could lose in the mid terms and that will not allow his important work to get done which can help make the world safer.

I still have the telegram my grandmother got in 1916 when my grandfather was killed on the front lines in France in WW1. She had 5 children including my mom who was only 4 years old. He went to war in the hope he would make enough money to come home and buy a farm.

To all the American folks bitching about the price of gas, I say 'suck it up baby'. You haven't seen nothing yet. Canadians have paid over $6 a gallon for gas for the last 10 years and Europeans $10 a gallon. The little lady (my boss) may be right: maybe I am watching too much 'news'. Your Canadian buddy.

A Few Election Points to Consider

First of all, to my Democrat friends, I would like to say I do not absolutely agree with all the Republican stances and talking points. However, in considering the direction your party is currently headed, remember, that by today's standards, Democratic president John F Kennedy, who at the time of his presidency was viewed as quite liberal, would by today's standards, be a conservative Republican. In his day Kennedy may have been considered a liberal Democrat, but he was absolutely in no way a Socialist. So, before you simply go 'vote the party line' as you have always done, consider just a few of the things your party is currently seems to be in favor of:

a. They largely are supporting boys in girl's locker rooms and sports.

b. They have taken the stance that a biological man can become a woman simply by saying so.

c. They are largely opposed to capital punishment, but in many states are fine with killing unborn babies right up to the point of delivery.

d. They largely are projecting that the answer to prison overcrowding is to release criminals back into the public space rather than building more prisons.

e. In many of their controlled cities, they feel non-citizens should be able to vote in our elections.

f. In many of their controlled cities, they are voting for less police.

g. They favor cashless bonding for criminals.

h. They are openly in favor of letting violent repeat offenders being released into the general population where these career criminals commit additional crimes.

i. They are by and large telling us it is fine to have open boarders which allows terrorists, drug runners and criminals freely into our country.

j. Due to their provably false 'climate change' doctrines, they seem to be fine with importing oil products refined in other countries, but have radically driven up gas prices by literally making it impossible to build a new petroleum refinery in the United States.

k. These same false 'climate change' doctrines have virtually eliminated mining our endless supply of much needed rare earth materials here in the United States; forcing us to import them from countries who are our enemies.

l. But finally, if you are in the habit of listening to, believing and agreeing with pathetically uneducated actors, singers, sports celebrities, and TV commentators for your political stances; if you feel the absolutely proven failed political doctrine of Socialism/communism is a great idea: In other words, if you don't have a clue, be sure and vote blue. If you have a brain in your head, at l least until your party gets back on track; for this elec tion, vote red.

Shorts (Some Funny)

Not News Worthy: Nothing gets a mass shooter off the tv faster than finding out he was either a democrat or a transexual.

Newsome: He wants to change the San Andreas Fault to 'Trumps Fault' like everything else is.

Socialism Supporters: Funny how all the people wanting socialism don't really contribute much to society to begin with.

Who Pays Taxes? Everyone is told how much money major sports figures such as pro golfers make on a given event. What is not talked about is how many millions in taxes these folks pay, or how many jobs they create.

Costly Dumb Degrees: Though certainly not cheap, now days many college degrees have literally no use in main stream society, making the holders of many of these worthless degrees virtually unemployable. One of the main reasons for the high cost of degrees such as this are tenured professors employed at high salaries and the ability of students to obtain unlimited amounts of dollars for student loans, regardless of what grades these students are achieving. But wait, where are the parents who are letting their kids get these dumb degrees? Don't complain about the cost when you are enabling the problem.

Food for Thought: In one election investigation, investigators found 2 addresses were used for over 9000 votes cast in the 2020 Georgia election.

Only in America: We will stop a football game, drag out a measuring chain, and look at the play 15 times from 6 different angles to make sure the referee made the correct call: yet we won't verify the integrity of an election for the highest office in our nation. Wake up folks.

Social Security v/s Welfare: We are constantly told how the social security program is running out of money. But we are never told how government social welfare programs are running out of money. Remember, the first group actually worked and paid for their benefits.

No Fraud? In the recent California election, there was one case where 24,000 votes came in late and they were all for one candidate. The chance of this happening is like flipping a coin 24,000 times and having it come up heads every time.

Language Use: For a joke, I always refer to 'ambiance' as 'ambivalence'. I guess I just do it so folks will correct me. My buddy Scott says maybe I just like putting the wrong 'emphaaasis' on the 'sylaaables'.

Money Use: Socialists keep telling me to stop confusing socialism with communism. I reply they should stop confusing their money with my money.

Elon Musk: His companies employ over 170,000 people. AOC drove Amazon out of New York, costing 40,000 potential jobs.
One builds. The other destroys.

Elon Musk: can explain how he got his wealth. AOC, Elizabeth Warren, Illan Omar and so many other politicians seem to have trouble explaining how they got theirs.

Odd: We are advised not to judge all Muslims by the actions of a few lunatics. Yet we are encouraged to judge all gun owners by the actions of a few lunatics.

Funny isn't it: Many liberals are vegans or vegetarians and are vehemently against killing animals for meat. However, they by and large seem to have no problem with killing a living human fetus during an abortion.

Scam Alert: If someone comes to your front door saying they are checking for ticks and Lymes disease due to warm weather, and they instruct you to take off your cloths and dance around with your arms in the air, DON'T DO IT. This is a scam. I wish I'd seen this warning yesterday. (I feel so stupid!)

Simple Health Test for Men: If you take a leak in the garden and it attracts ants: Diabetic // If grass dries up: Too high in salt // Smells like barbeque: High Cholesterol // Forget to zip up: Alzheimer's

Farmer and Rancher Advice: To our City Folk friends visiting in rural areas. If you happen to be out in a crop field and need a Kleenex, and you happen to spot say, a discarded shop towel. DON'T USE IT. There is a very distinct chance it has already been 'used'.

Trust the Science? Nothing says "Trust the science" like Fauci getting a presidential pardon and then him taking the 5th 111 times.

Who Decides: People who don't work have no right to tell people who do work that they aren't paying enough taxes. Remember, everything 'free' is paid for by someone who 'works'.

Delusional Sexuality: A man taking estrogen and then announcing he is a woman is as delusional as me taking vitamin C and announcing I am now a citrus fruit.

More Government? If your answer to every failure of government is for more government, you are like an alcoholic trying to drink themselves sober.

Entrepreneur News: "I just sold my pet homing pigeon on EBay for the 22nd time."

Boat Owners For Trump: I see most boat owners are Trump supporters. That is because there's currently no government program for giving boats away. You have to work for a boat.

Recognition: The Trump family has skyscrapers named after them. Whoopi Goldberg has a cushion that emits a foul noise.

Ever Notice: You don't see any protests at trade schools.

ICE News: ICE has been involved in the deaths of 5 Americans; illegal aliens have killed 1713. Guess who the socialist agitators have a problem with?

Worthless Costly Items: Car alarms. Cost v/s value, anyone ever pay any attention to them other than be irritated because someone accidently set one off? Anyone ever know of a case where they actually stopped a crime?

MUSINGS

Konnie Middleton: The Present

From a degree in education, to a globe-trotting cloths buyer,
Taking on a challenge never deters her.

With husband Tom they created a life,
A power couple they made as husband and wife.

Then daughters Lindsay and Nichole came into the mix,
Lucky for us they located in Phoenix,

The owner of one of the sincerest and greatest senses of humor,
A most excellent friend, mother and wife, are words that describe her.

It has been a joy to be drawn into her realm,
Get aways and gatherings are made better, with our 'Queen Bee' at the helm.

She created and hosts the best Christmas parties any person could attend,
With decorations, endless food, and presents no end.

Great trips to Tubac and Carmel, to decorate our memory trees;
To awards from UND, just one of her and Tom's legacies.

Our 'Queen Bee' will aways be with us, here or away,
She positively impacts our lives, what can we say.

One of the great toasts ever, is awarded to her,
So let us raise our glasses, to give her some cheer.

"Yesterday's gone, tomorrow never comes, and each day is a gift: that's why we call it the present."
"Konnie Middleton, you are the gift: So, here's to the present!"

To our great sorrow Konnie Middleton passed away this past fall after a long and courageous battle with cancer. She will be sorely missed but her memory will never die.

"Fly safe my friend". Chuck and Linda

Concerned, Compassionate, Caring, People? Odd isn't it that those same 'concerned, caring, compassionate' activists and politicians that are constantly wanting to inspect ICE facilities to 'make certain the poor illegals are being properly taken care of,' never take any of their precious time to tour a Veterans hospital to check on the same thing? Just asking for a friend.

Actual Quotes

Schumer: Years ago Democratic Senator Chuck Schumer made the following statement: "The #1 reason people come to the United States illegally is to defraud systems like social security and I want to stop it." In view of the stance of Senator Schumer's party now days, a sane person would have to ask: "What in hell happened to the Democratic party anyway?"

Bill Maher: Recently, two democrat legislators released a simple pledge saying "We're capitalist and not socialist, we want safety not lawlessness, we are proud not ashamed of America." Only 8 out of 212 of their fellow Democrat legislators signed it. Eight. That tells you everything you need to know about where this party is headed.

Abdul El Sayed: Quote attributed to Michigan Senate candidate Abdul El Sayed: "You may not hate Muslims, but they sure hate you." Again, a sane person would ask, why are we fighting radical Muslims in Iran but are electing them into high public office here in the US?

Reagan: "If Communism is so great, it is odd that when the Berlin wall fell you didn't see mass migration to East Berlin."

AOC: "Under capitalism man oppresses man. Under Socialism it is the other way around." Folks, you simply can't make this stuff up.

Actor Richard Gere: "The moment Trump came into office; we packed our bags and moved to Spain." A sane person would say, "Please do not come back."

Prayer Corner: Please take a moment to say a prayer for a friend, a prayer for a loved one, or a prayer for yourself. The Power of Prayer is real. Give it a try.

Thanks for reading Crapper and as always: We have our family our friends, our health, and time: The rest is smoke and mirrors. Chuck, Linda and Jack.
